

INSTALLATION

Eurovent can offer a range of installation services ranging from supervision of clients own personnel to supplying a full team of mechanical and electrical installation engineers.

COMMISSIONING

Conducted to international standards our team of mechanical and systems specialists can provide a full commissioning service, including preparation of IQ/OQ protocols.

VALIDATION

Establishing documented evidence which provides a high degree of assurance that a specific process will constantly produce a product meeting its predetermined specifications and quality attributes (F.D.A.)

Validation support to F.D.A. guidelines is an essential part of the Eurovent Project Service.

TRAINING

To ensure the safe and efficient operation of your equipment requires effective training. Eurovent can offer customised training programmes to suit your particular requirements at the Eurovent Technology Centre or on the client's own premises.

AFTER SALES SERVICE

Eurovent provides a complete after sales service, including a comprehensive spare parts back up and a choice of service contracts to suit your particular requirements.

PRODUCT SIZING MILL

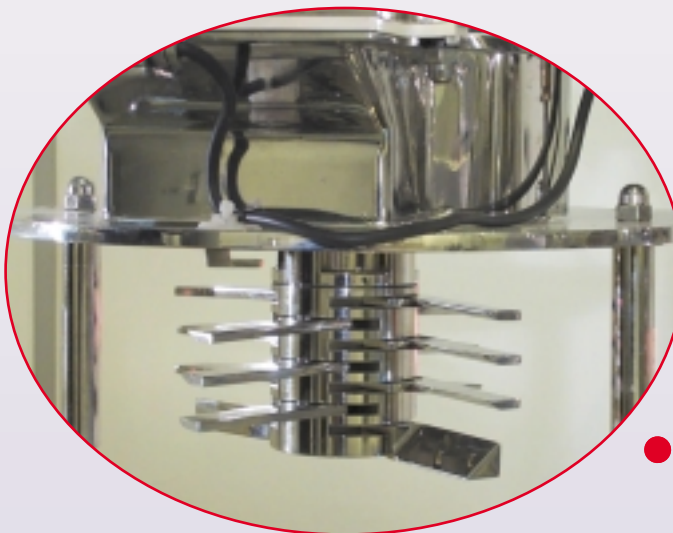

Eurovent Milling Technology
Drying | Granulation | Coating

PRODUCT SIZING MILL

- **Designed to the latest GMP standards.**
- **Contact and non-contact parts manufactured from 316L stainless steel.**
- **Contact parts polished to a mirror finish.**
- **Either manual or vacuum loading options.**

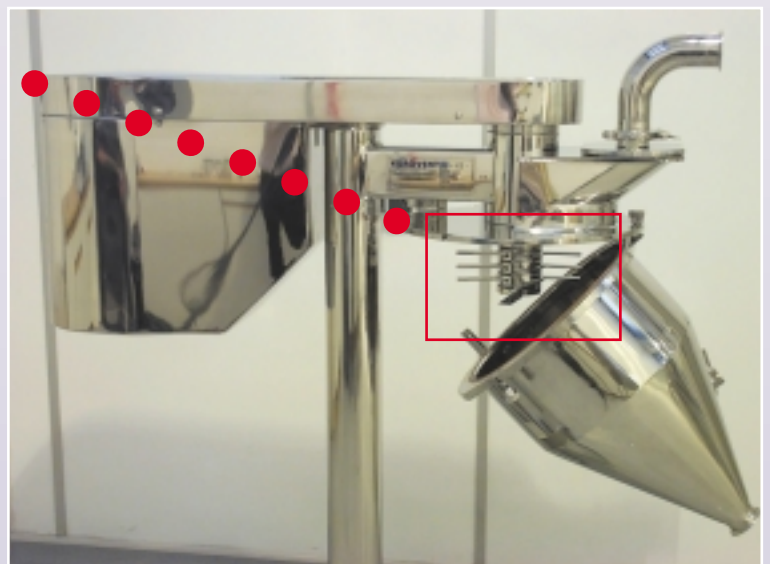

Multiple blade design to provide high performance milling.

The PSM has a multiple blade design to give high performance milling and can be rapidly dismantled for product change and cleaning validation.

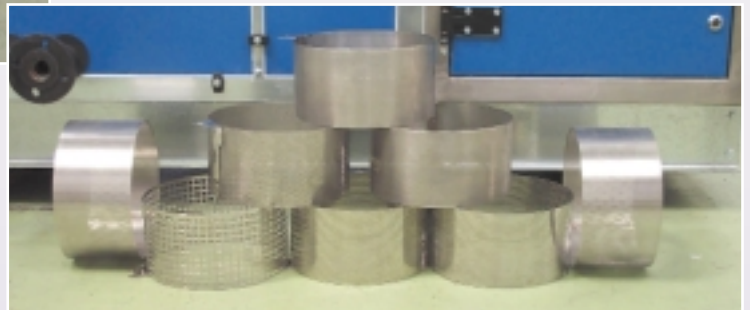

The PSM has a 360° Mesh to gain maximum uniformity, eliminating dead areas, overworking & creation of fines.

Fully welded meshes eliminate product entrapment, with various mesh sizes to suit most applications.

PRODUCT SIZING MILL

Rapid and easy dismantling for speedy product change and cleaning validation.

Safety features include proximity switches, Castell safety locks and also a highly visible emergency stop button.

Full range of sieves suitable for both wet and dry applications.

Minimum heat generation in product.

Nitrogen purging option.
