

# Introducing the Q coater

## The Eurovent multi-drum side-vented tablet coater.

- Easily cleanable with the drum in or out of coater, 200mm clearance all round, front and back - all of drum and housing can be wiped down without removing the drum, less down time means reduced running costs.
- Interchangeable drums - minimum investment with maximum output. Reduced QA costs.
- Spray Guns designed for quick and accurate set up.
- Flush tank cabinet drain - no dead leg - ease of cleaning, means no cross contamination.
- No silicon sealant inside the cabinet - ease of cleaning with no cross contamination, reduces running cost and lost products.
- Fully welded internal chamber with no flat surfaces for efficient draining after CIP - ease of surface drying, reduces down time and running costs.
- CIP nozzles welded into cabinet with tri clover clamp fittings - no screw threads - ease of cleaning, reduces down time and running costs.
- Spray nozzles adjustable in all 3 axes for best results with different size batches, for optimum results and reduced running costs.
- Inflatable seal in all cabinet access doors - guarantees a seal, eliminates leaks maintaining through-flow of regulated air.
- Quick release exhaust plenum - no screws - ease of cleaning, reduces down time and running costs.
- Internal inlet and exhaust dampers welded in place - no bolted flanges- ease of cleaning, reduces down time and running costs.
- Double hinged doors - coater can be accommodated in a narrow room, reducing installation, set up and running costs.
- Control system - 21 CFR part 11.
  - GAMP 4
- Full validation package.
